

MongoDB Report

Explicación breve del caso de uso elegido

Se diseñó un sistema de reservas de citas para un negocio. MongoDB almacena usuarios, servicios y citas usando documentos con estructuras flexibles.

Descripción de las colecciones

- users: datos de clientes con campos anidados y listas.
- services: servicios ofrecidos con precio y duración.
- appointments: citas que referencian usuarios y servicios.

Ejemplos de documentos

```
{ "name": "Carlos", "email": "carlos@example.com", "visits": [{"date": "2025-01-10", "service": "corte"}] }
```

```
{ "name": "Corte de Cabello", "duration": 30, "price": 20000 }
```

```
{ "user_id": "...", "service_id": "...", "date": "2025-02-01", "status": "confirmada" }
```
